

INTELLICAST FLIGHT

WIRELESS AUDIO ADAPTER TRANSMITTER + RECEIVER

Say “no thanks” to those complimentary wired headphones. With the IntelliCast Flight Audio Adapter, you can listen to all your in-flight entertainment using your own hi-fi wireless earbuds or noise-cancelling headphones. Just plug it into the aux port, connect to your earbuds, and settle in for the flight – it’s really that easy. The detailed LCD info screen takes all the guesswork out of the setup process, and dual Bluetooth wireless connection support lets you connect two listeners to a single aux port, like a fully wireless headphone splitter. And with its extended 20-hour battery life, your IntelliCast Flight will get you through your entire flight and still have enough juice to let you play your music and take calls in your rental car.
